

# water industry services

[www.fittresources.com.au](http://www.fittresources.com.au)

FITT Resources provides asset condition inspections conducted by experienced specialists across all areas of the water industry and all types of assets including manhole inspection & grading, sewage pump stations, sewage treatment plants, reservoirs & water treatment plants.

Once a condition assessment has been completed, we provide operators with a detailed report outlining the overall condition and soundness of all water assets and equipment, along with recommendations for any repair and/or maintenance work that may be required. All data is collated onto the spreadsheet with hyper linked photos from each manhole.

## *Asset Inspection*

THE PROBLEM

THE SOLUTION

## *Water Infiltration*

# *Manhole Refurbishment*

When the right conditions exist in a sewer system, sulphuric acid is released which corrodes the concrete, mortar, steel and ductile iron. In the most severe cases, bacterial activity can destroy up to 25mm of concrete in a year.

Fitt Resources refurbishes your manholes using quality products to reduce corrosion damage.

# *FITT Manhole Cover & Frame Replacement*

Innovative FITT Manhole Chimney Replacement including Cover and Frame, Road Levelling & Infiltration Sealing Service. Fast and efficient service which has the ability to complete multiple quality replacements in a day.

# *Asset Refurbishment*

Pump Stations • Water Reservoirs • Swimming Pools & More

## *Workshop Services*

- Complete rotating equipment refurbishment
- Service repair, condition monitoring, removal, installation and commissioning offered nationally for all makes and models of pumps used in the water and waste water industry.
- Integrated workshops available offering in house
- Strip and inspection reporting
- Complete machining capabilities including re engineering or parts
- Blasting, metal repair and coatings
- Rotating element balancing
- White metal bearing servicing
- Performance testing services

# Pumps

For industries reliant on roto dynamic equipment, we offer a sophisticated range of pump solutions and engineered pump sets from leading international pump manufacturers including but not limited to...

## Liberty Pumps

Sump, Sewage and Effluent Pumps

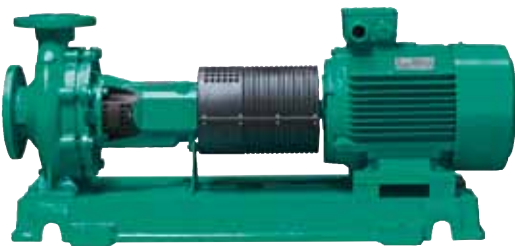

## SEEPEx.

ALL THINGS FLOW

SEEPEx develops and produces progressive cavity pumps, macerators and control systems. We offer a variety of market-specific product groups with high-performance ranges that provide customers with tailor-made pumps.

## wilo

Our pumps and systems for heating, air-conditioning, cooling, water supply as well as drainage and sewage.

## Southern Cross

Southern Cross pumps have proven proficient in upholding the highest calibre of industry standards.
